

DDA Physical Bitcoin ETP

Investment Objective

DDA Physical Bitcoin ETP is an exchange traded product (ETP) that tracks the price of Bitcoin (BTC). The ETP is 100% physically backed by BTC and trades on major European exchanges. Each Note gives the holder a claim on a predefined amount of BTC.

Key Details of DDA Physical Bitcoin ETP

- Physically backed by Bitcoin stored in cold storage
- Listed and traded on Xetra, SIX and Euronext
- Compliant and trusted crypto custodians with 3rd party insurance
- No lending – Bitcoin held in custody are not lent out
- Attractive management fee of 0.95% p.a.

Pricing Information

- CE Entitlement (CE Factor): Each Note is backed by 0.0001 Bitcoin at launch
- Price: CE Entitlement (CE Factor) x Bitcoin price

Key Risks

Investors' capital is at risk and investors may not get back their initial investment. The ETP is structured as a fully collateralized debt security. The Notes traded on exchanges are bought/-sold at market prices which may be different to the net asset value of the ETP or Bitcoin.

About the Issuer and DDA

* refer to physical delivery application. If a holder is unable to receive BTC due to legal or regulatory reasons (such as undertakings for collective investment in transferable securities (UCITS)), the notes will not be redeemed by delivery of BTC.

** income taxation for german investors: the notes should not qualify as other capital claims within the meaning of section 20 para. 1 no. 7 german income tax act (Einkommensteuergesetz, "EStG") and the sale and redemption of the notes should, therefore, not lead to taxable investment income pursuant to section 20 EStG being subject to the flat tax regime (abgeltungsteuer) (25% plus 5.5% solidarity surcharge and church taxes as the case may be) irrespective of any holding period, rather the provisions on private sales transactions (also known as "short-term capital gains") pursuant to sections 22 no. 2, 23 para. 1 sentence 1 no. 2 sentence 1 EStG should apply which means that the acquisition and sale of notes by a private investor should only be taxable in germany if the period between acquisition and sale does not exceed one year (for the calculation of the one year period, the conclusion of the purchase and sale transaction under the law of obligations is decisive in each case). If a private investor sells his notes more than one year after he has acquired them, such sale should not be subject to tax, moreover, the redemption of the notes should not constitute a sale under the private sales transaction rules.
